1 Introduction

Scope of this guidance note

- 1.1 This note relates to the New Firefighters' Pension Scheme 2006 and it sets out the general method for:
- > converting standard membership transferred-in service credits to special membership transferred-in service credits for members who are entitled to treat such service as special pensionable service
 - > converting standard membership added years to special membership added years for members who are entitled to treat such service as special pensionable service, and for
 - > converting standard membership additional pension benefits (APBs) to special membership APBs for members who are entitled to treat such benefits as special firefighter member benefits
- 1.2 The purpose of this note is to:
- 1.2.1 provide to administrators the tables and guidance to be issued by the Scheme Actuary that is referred to in the following regulations:
- > Schedule 1, Part 12, Rule 17 (7) of the Firefighters' Pension Scheme (England) Order 2006 (SI 2006 No. 3432) as amended
- 1.2.2 provide factors for converting standard membership added years to special membership added years, and to
- 1.2.3 provide factors for converting standard membership APBs to special membership APBs, as requested by the Department for Communities and Local Government for such purposes.
- 1.3 The actuarial factors in this note come into effect immediately.
- 1.4 This guidance replaces the previous guidance dated 13 November 2014.
- Caveat**
- 1.5 This note should not be used for any purpose other than as described in paragraph 1.1 above.
- 1.6 This note only covers the actuarial principles around the calculation and application of converting transferred-in service credits, added years and APBs. Any legal advice in this area should be sought from an appropriately qualified person or source.
- 1.7 Third parties should not rely on this guidance, but should separately seek their own actuarial advice where appropriate.

Questions about this guidance

- 1.8 If you have any questions about how to use this guidance, in the first instance administrators should consult published information.
- 1.9 If this does not help, administrators may contact the Fire Pensions Team, by e-mail or writing to:

Firefighters' Pensions Team
WPP Division
Department for Communities and Local Government
Zone 5/F6
Eland House
Bressenden Place
London SW1E 5DU

- 1.10 The Fire Pensions Team will seek input from the Scheme Actuary if necessary.

2 Calculations and examples

Formula for converting standard membership transferred-in service credits to special membership transferred-in service credits

- 2.1 The calculation of the special membership transferred-in service credit is given by:

$$\text{Special Service Credit} = \text{Standard Service Credit} * F$$

F conversion factor for joint life pension with 50% spouse's pension –
Table A

Formula for converting standard membership added years to special membership added years

- 2.2 The calculation of the special membership added years is given by:

$$\text{Special Added Years} = \text{Standard Added Years} * G$$

G conversion factor for joint life pension with 50% spouse's pension –
Table B

Formula for converting standard membership APB to special membership APB

- 2.3 The calculation of the special membership APB is given by:

$$\text{Special Membership APB} = \text{Standard Membership APB} * H$$

H conversion factor for joint life pension with 50% spouse's pension –
Table C

Examples

- 2.4 Figures in these example calculations are rounded to a suitable level of accuracy. Where a figure is shown as an intermediate step in the calculation, subsequent steps will use this rounded figure as written on the page. It is also perfectly acceptable to perform these calculations on a computer spreadsheet, such as MS Excel. In this case the figures calculated in the intermediate steps will usually not be rounded, so the final answer may be slightly different to that shown in these examples. The difference will not be significant and both methods are valid. However, when performing calculations for paper based calculations, the figures calculated as intermediate steps should not be rounded to a lower level of accuracy than used in these examples.
- 2.5 The relevant date specified in the examples as the date on which the calculation should be made, is the date the member elects to become a Special Member.

2.6 Example 1: Male member with transfer-in service credit

The following information is assumed for this calculation:

A. Member date of birth	1 April 1971
B. Relevant date	1 Aug 2014
C. Member's age last birthday	43
D. Gender	Male
E. Standard membership transfer-in credit	10 years 6 months

Special service credit = Standard Service Credit (E) * F

F = 0.700 (from Table A "Male Conversion Factors" column)

Substituting this value into the formula above we get:

$$\begin{aligned}\text{Service Credit} &= 10.5 \times 0.700 \\ &= 7.35 \text{ years} \\ &= 7 \text{ years } 0.35 \times 365 \text{ days} \\ &= 7 \text{ years } 128 \text{ days (rounding up to next complete day)}\end{aligned}$$

Therefore the total special service credit is **7 years 128 days**.

2.7 Example 2: Male member with added years

The following information is assumed for this calculation:

A. Member date of birth	1 December 1959
B. Relevant date	1 Aug 2014
C. Member's age last birthday	54
D. Gender	Male
E. Added Years	4 years 150 days

Special added years = Standard added years (E) * G

G = 0.724 (from Table B)

Substituting this value into the formula above we get:

$$\begin{aligned}\text{Added years} &= 4.4110 \times 0.724 \\ &= 3.1936 \text{ years} \\ &= 3 \text{ years } 0.1936 \times 365 \text{ days} \\ &= 3 \text{ years } 71 \text{ days (rounding up to next complete day)}\end{aligned}$$

Therefore the total special membership added years is **3 years 71 days**

2.8 **Example 3:** Female member with additional pension benefit (APB)

The following information is assumed for this calculation:

A. Member date of birth	1 September 1955
B. Relevant date	1 Aug 2014
C. Member's age last birthday	58
D. Gender	Female
E. APB	£350 pa

Special membership APB = Standard membership APB (E) * H

H = 0.922 (from Table C)

Substituting this value into the formula above we get:

$$\begin{aligned} \text{APB} &= 350 \times 0.922 \\ &= 322.70 \end{aligned}$$

Therefore the total special membership APB is **£322.70 pa**

Appendix

Table A : Conversion Factors for Transferred-in Service Credits

Age last birthday at relevant date	Males Conversion Factors	Females Conversion Factors
55 and under	0.700	0.710
56	0.706	0.713
57	0.716	0.721
58	0.728	0.731
59	0.740	0.740

Table B : Conversion Factors for Added Years

Age last birthday at relevant date	Conversion Factors
35 and under	0.700
36	0.703
37	0.709
38	0.715
39	0.721
40-55 inclusive	0.724
56	0.725
57	0.729
58	0.735
59	0.741

Table C : Conversion Factors for Additional Pension Benefits

Age last birthday at relevant date	Conversion Factors
55 and under	0.800
56	0.843
57	0.881
58	0.922
59	0.967
